A World Horticulture Centre set to be established in Jinning China

15 December 2023 | News

With Jinning Company as the initiator to establish a World Horticultural Centre, Aibida will assist and support the venture, while Bom Group will act as the project's technical consultant.

With Jinning Company as the initiator to establish a World Horticultural Centre, Aibida will assist and support the venture, while Bom Group will act as the project's technical consultant.

Three companies - Jinning State-Owned Capital Operation (Jinning Company), Bom Greenhouses (Bom Group) and Yunnan Aibida Horticulture Technology - are coming together to launch a collaboration in the field of horticulture in Jinning, China. They plan to establish a 30-hectare World Horticultural Centre.

With Jinning Company as the initiator to establish a World Horticultural Centre, Aibida will assist and support the venture, while Bom Group will act as the project's technical consultant. A general technical consulting service contract was signed.

Situated in Kunming, the heart of China's floral hub, Jinning Company has a strong commitment to driving the development of the horticulture sector. The company has successfully built a state-of-the-art flower industry park with nearly 200 hectares of greenhouses and an international flower logistics centre. With the new World Horticultural Centre, they are looking to create an innovative and functional location with research laboratories, a 25-hectare greenhouse, an ecological park, and several education and meeting spaces. "With our partners, we aim to create a world-class horticultural centre that will catalyze the development of the sector, both locally and globally", they explain.

Aibida has extensive expertise in horticultural sciences and technology. Their focus lies in modern horticulture techniques and research, making them a perfect collaborator for Jinning Company in their quest to establish a World Horticultural Centre.

Bom Group will provide technical support and expert advice throughout the project, helping Jinning Company establish a horticultural centre.

The signing of a technology consulting agreement between Jinning Company and Bom Group solidifies their commitment to working together to achieve their shared vision. The collaboration brings together the strengths of the three entities, with Jinning Company's local knowledge and infrastructure, Aibidaâ??s scientific expertise, and Bom Group's technical guidance.
