This initiative will help the students to learn from Chinese experiences in order to combat agricultural challenges

Chinese educational institutions and Pakistani educational institutions have launched a Sino-Pak dual diploma programme in Modern Agriculture Technology. Chinaâ??s Bailie vocational college, Tang International Education Group and the University of Agriculture Faisalabad have collaborated on the programme.

During the two years of the course, the students are required to learn the Chinese language plus the programme will equip the students with modern knowledge of agriculture and work for agricultural development.

This initiative will help the students to learn from Chinese experiences in order to combat agricultural challenges. It is a market-driven program based on agricultural technology and business with the help of mutual and experiential learning.

The launching ceremony was chaired by UAF Vice Chancellor Prof Dr Iqrar Ahmad Khan while Bailie Vocational College China President Peng Dongjun, President Tang Pakistan Ma Xiaoyan, CEO Zalmi Foundation Cedric Aimal Edvin, Principal Community College Dr Anjum Zia and other notables attended.
