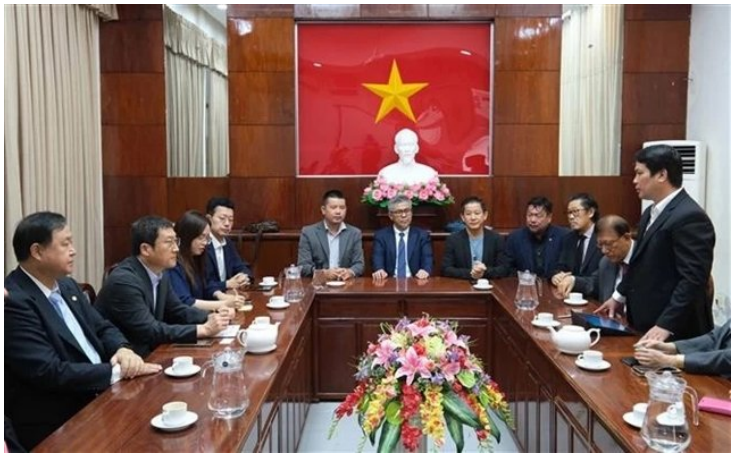
Korea's KEA explores opportunity to establishment sustainable energy system in the international community and contribute to achieving global carbon neutrality



Korea's KEA explores opportunity to establishment sustainable energy system in the international community and contribute to achieving global carbon neutrality

Director of the Department of Industry and Trade of the Mekong Delta city of CáºSn ThÆ¡ on Thursday received a delegation of the Korean Energy Agency (KEA) led by its President Lee Sang-hoon who came to seek investment opportunities in the city.

HÃ VÅ© SÆ¡n, Director of the Department of Industry and Trade of the Mekong Delta city of CáºSn ThÆ¡, received a delegation of the Korean Energy Agency (KEA) led by its President Lee Sang-hoon who came to seek investment opportunities in the city.

The KEA President said that the Republic of Korea (RoK) is making continuous efforts to support the establishment of a sustainable energy system in the international community and contribute to achieving global carbon neutrality. As part of those efforts, the KEA has implemented many projects abroad over the past 10 years to support climate change response and economic growth in other countries including Viá»?t Nam.

KEA President wished that the RoK and Viá»?t Nam including CáºSn ThÆ¡ city will cooperate in the field of carbon neutrality. He informed that KEA staff in HÃ Ná»?i are performing energy audit work to help save energy and improve efficiency for factories, adding that the KEA is trying to expand the work to industrial parks. SÆ¡n said that the city hopes the Korean agency will help it connect with Korean businesses to attract investment to its key projects.
