

Global Water Challenge and Cargill partners across Five Continents to address water challenges

02 September 2024 | News

During World Water Week 2024 (25-29 August) Global Water Challenge (GWC) and Cargill announced the expansion of their Cargill Currents partnership platform with a renewed investment of over \$5MM over three years and new plans to tackle water-related challenges in communities and basins across five continents: Africa, Asia, Europe, North America and South America. Cargill Currents supports community health and livelihoods, promotes watershed health and advances water security around the world.

During **World Water Week 2024** (25-29 August) Global Water Challenge (GWC) and Cargill announced the expansion of their Cargill Currents partnership platform with a renewed investment of over \$5MM over three years and new plans to tackle water-related challenges in communities and basins across five continents: Africa, Asia, Europe, North America and South America. Cargill Currents supports community health and livelihoods, promotes watershed health and advances water security around the world.

In its second phase, the partnership platform will build upon these achievements and continue to focus on prioritizing solutions that deliver multiple benefits, including increasing access to water, sanitation and hygiene (WASH), building climate change resilience, improving farmer livelihoods and empowering women, while also supporting watershed health and sustainable agriculture initiatives in water-stressed regions.

Cargill Currents uses a context-based approach designed to address the specific water needs of each region, including water access, availability and quality issues within priority communities or basins. This work supports Cargill's ambition of enabling a water-positive impact across its operations, supply chains, and communities by 2030, with an emphasis on improving access to safe drinking water in priority communities around the world.

Since *Cargill Currents* launched in 2021, the partnership platform has positively impacted **more than 135,000 people with improved WASH access across 68 communities** in Brazil, Cameroon, Ghana and Ivory Coast. *Cargill Currents* has built a solid foundation and is **on track to benefit over 150,000 people by the end of 2024**, significantly contributing to Cargill's goal of facilitating access to safe drinking water and sanitation for 500,000 people by 2030.

Global Water Challenge (GWC) is a sector leader in mobilizing clean water access, advancing water security and community empowerment in high need regions around the world. Since 2005, GWC has positively impacted more than 3 million people across Africa, the Americas and Asia with improved WASH delivery while providing critical tools, data and best practices to reach millions more. With 100+ multi-sector partners, GWC engage for action - catalyzing financial resources and driving innovative programming for sustainable, local solutions.
