

SynTech integrates with Agldea to enable Ag Companies to outsource R&D, breeding, and deregulation projects

10 February 2025 | News

The strategic move strengthens SynTech Research Group's market position in the Americas

The strategic move strengthens SynTech Research Group's market position in the Americas

SynTech Research Group has integrated with Agldea, a prominent global player in agronomy, biology and biotechnology applied research. This strategic move strengthens SynTech Research Group's market position across the Americas, and will create a unique and powerful platform for Ag Companies to outsource end-to-end R&D, Breeding and deregulation Projects. The powerful combination of both companies will result in unprecedented integral solution for Ag Companies from research to registration globally.

The integration of Agldea will enable SynTech Research Group to expand its portfolio of services in Seeds and Traits and Biosolutions testing. Agldea's teams, processes and infrastructure will add tremendous value in the areas of technology testing, efficacy and breeding services. Agldea, currently based in Argentina, also perfectly complements the current geographical footprint of SynTech Research Group in USA, Brazil, Argentina and the rest of Latin America.

Yvonnick Jambon, CEO of SynTech Research Group, affirmed the positive impact of this integration: "This acquisition deepens our commitment to serving clients in Argentina, a vital market for agricultural advancements, while leveraging our existing operations across the Americas and beyond. Agldea teams knowledge and expertise are perfectly aligned with our strategic vision of providing integrated services to our clients."

Gonzalo Grigera, CEO of Agldea, also added: "We are excited to join SynTech Research Group, a step totally aligned with our ambition to become global leaders in R&D services. The remarkable complementation of both companies and the common vision into the future, will revolutionize the way we serve our customers, and create a thrilling place for talents to develop their careers."

The integration, formalized on January 31, 2025, marks a significant step in consolidating SynTech Research Group the leading agricultural CRO worldwide
