Sabanto expands autonomous tractor technology to Australia

10 October 2025 | News

Exclusive partnerships with OneAg and Vantage NSW bring Retrofit autonomy systems to farmers across Australia

Exclusive partnerships with OneAg and Vantage NSW bring Retrofit autonomy systems to farmers across Australia

Sabanto, a leader in agricultural autonomy, announced its expansion into the Australian agriculture market. Through exclusive partnerships with OneAg and Vantage NSW, Sabanto will provide farmers with retrofit autonomy systems that convert existing tractors into fully autonomous machines, boosting operational efficiency and productivity without the high costs of new equipment.

â??Australiaâ??s agricultural sector is highly innovative, and weâ??re eager to partner with local experts to deliver affordable autonomy to farmers,â?• said Craig Rupp, CEO and Founder of Sabanto. â??Together with OneAg and Vantage NSW, weâ??re helping farmers adopt this technology with the local expertise and service they already trust."

OneAg, a precision agriculture dealer known for high-performance solutions, will integrate Sabantoâ??s retrofit autonomy kits into its offerings, continuing its commitment to next-generation farming technology.

â??Autonomy represents one of the biggest shifts in how weâ??ll approach farming over the next decade. Sabantoâ??s technology allows us to expand whatâ??s possible for productivity,â?• said Michael Munro, Head of Autonomy at OneAg.

Vantage NSW brings deep expertise in precision ag solutions for all stages of farming operations. By incorporating Sabantoâ??s solutions, Vantage NSW helps farmers modernize operations and extend the life of their equipment.

Michael Casey, Founder and Director of Vantage NSW says, â??Partnering with Sabanto allows us to deliver advanced autonomy solutions, helping farmers improve efficiency while addressing labor and cost challenges.â?•

Sabantoâ??s retrofit kits integrate with existing machinery, converting tractors into autonomous machines capable of operating 24/7. The systems help farmers reduce capital expenditures, overcome labor shortages, and maximize operational uptime.

With the addition of OneAg and Vantage NSW to its dealer network, Sabanto continues to advance its mission of accelerating agricultural autonomy worldwide, enabling more farmers to benefit from smaller, smarter, more affordable machinery.
