

Malaysia's Agroz and Harvest Today collaborate to launch Agroz Groz Wall

13 October 2025 | News

Collaboration underscores Malaysia's goal to stabilize food security, sustainable agriculture technology and ASEAN market expansion

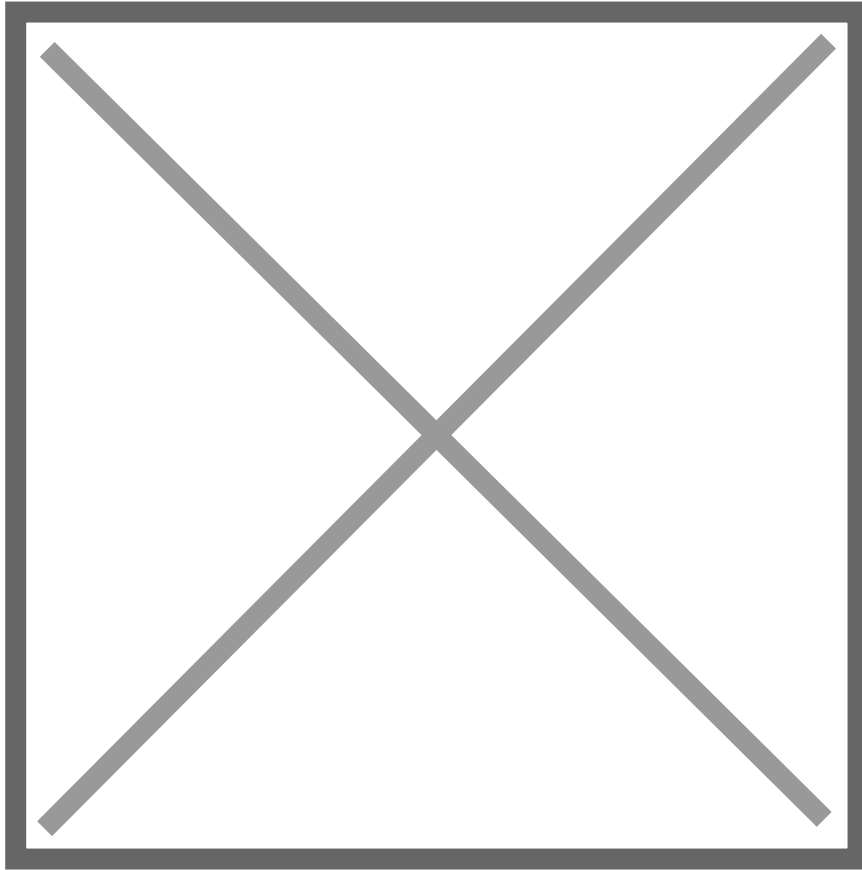

Collaboration underscores Malaysia's goal to stabilize food security, sustainable agriculture technology and ASEAN market expansion

Agroz Inc., a Malaysia-based innovative, fully vertically integrated agricultural technology (AgTech) company, announced a strategic collaboration with U.S.-based Harvest Today, LLC, developer of the patented Harvest Wall[®] growing system, to launch the Agroz Groz Wall.

The collaboration was unveiled at the Future Food-AgTech Festival (FFF2025) witnessed by Datuk Seri Isham Ishak, Secretary General at the Ministry of Agriculture and Food Security, where Agroz is showcasing Agroz Tech and the Agroz Groz Wall, from 8 October to 12 October 2025.

Under Agroz and Harvest Today's collaboration, Agroz will integrate Harvest Today's grow system as a **key component** to the development of the Agroz Groz Wall that will be offered to farms, hotels, restaurants, cafes and schools.

- **Food Security:** Malaysia and Association of Southeast Asian Nations (ASEAN) rely heavily on imports for fresh produce. Localized vertical farms reduces dependence, enhances resilience and reduces carbon footprint by removing long travels from farm-to-plate.
- **Sustainable Technology:** The Company believes Agroz Groz Wall may enable pesticide-free, high-yield cultivation while using minimal water and space.
- **Regional:** Agroz Groz Wall will be offered for clients across ASEAN

"This collaboration underscores our vision of bringing Agroz's freshest, nutrient rich, clean and pesticide free vegetables closest to where they are consumed, in hopes of making farm-to-plate a reality through food innovation and sustainability," said Gerard K M Lim, CEO of Agroz.

"We are proud to bring the "Harvest Wall" to Southeast Asia with Agroz. Our goal is to demonstrate that vertical farming can thrive in tropical markets when you apply practical thinking and solid designs" said Rick Langille, CEO of Harvest Today.

Agroz Inc. is an agricultural technology (AgTech) company that focuses on designing, building, and managing indoor Controlled Environment Agriculture (CEA) vertical farms. The company also operates CEA farms in local communities to grow and supply pesticide-free, fresh, and nutrient-rich vegetables directly to consumers and businesses. Agroz emphasizes public education about its farming methods. The company's operations rely on its proprietary Agroz OS system, which integrates digitally automated hardware for managing farm conditions and AI-based software for optimizing farm operations.
