

Azelis opens Agricultural & Environmental Solutions application lab in India

17 April 2023 | News

The laboratory focuses on formulation support for crop protection, seed treatment and micronutrient formulations that align with international methods and standards for formulations.

The laboratory focuses on formulation support for crop protection, seed treatment and micronutrient formulations that align with international methods and standards for formulations.

Azelis, a leading innovation service provider in the specialty chemicals and food ingredients industry, has launched a novel laboratory for the Agricultural & Environmental Solutions (A&ES) industry in India.

A team of highly skilled and experienced agricultural technical specialists staffs the new laboratory, which is equipped with the latest equipment. The laboratory focuses on formulation support for crop protection, seed treatment and micronutrient formulations that align with international methods and standards for formulations.

With the opening of this A&ES laboratory in India, in addition to Azelis' Pharmaceutical & Healthcare, Personal Care, Food & Nutrition, and Coatings, Adhesives, Sealants & Elastomers (CASE) laboratories, Azelis India is able to provide high-quality technical solutions across a wide range of industries to its customers and principals.

The advanced facility represents a key milestone in the group's commitment to innovation and formulation services.

Aparna Khurana, Azelis India Managing Director said, "The newly opened laboratory expands our agrochemical capabilities to better serve our customers and principals. By offering support across all stages of the formulation development process, we demonstrate how Azelis provides value-adding services in addition to our extensive portfolio of products. Our commitment to innovation has always been at the core of our business. This new laboratory demonstrates our commitment to continuously invest in innovation capabilities."
